SITE DESCRIPTION

The rise to the south of this landscape shields the R44 and suburban development from view, creating a visual continuum between the Eerste River corridor, the agricultural fields in the foreground, and the foothills and high peaks of the Helderberg Range beyond. This sub-valley also enjoys unique views of Stellenbosch town to the north, with a clear view to the spire of the Dutch Reformed "Moederkerk".

STATEMENT OF SIGNIFICANCE

This landscape unit is the site of two extremely fine farm werfs of very high heritage significance. The landscape unit demonstrates the relationship between river corridor and settlement, as well as the rural patterns of use and the wilderness beyond. This interplay is extremely characteristic of the Cape Winelands, and key to its high cultural significance.

HERITAGE VULNERABILITY

This landscape unit is particularly vulnerable to agri-industrial and office park development, which has already impacted the site. The suburban sprawl of Stellenbosch is a real threat to this unique heritage site and its broader landscape.
