ARCHITECT/BUILDER

SITE DESCRIPTION

A rare U-shaped homestead, flanked by outbuildings and with a linear cellar set to the front, and a threshing floor in front of this. The homestead is reached via a long avenue from Blaauwklippen Road. All gables are clipped, and the date 1835 can be seen, attributing the buildings to Van Brakel. Mature trees planted in linear patterns reinforce the sense of the whole. A historic lime kiln is the last structure of this type in the Stellenbosch district.

STATEMENT OF SIGNIFICANCE

The Stellenkloof werf is a rare, intact werf space. As a whole the werf is an important historic space and exhibits a pattern of farming and settlement on the foothills of the Eerste River valley, as well as exhibiting some original fabric of some age, and an extremely rare lime kiln that is a former National Monument site. The site has a high degree of architectural, aesthetic/contextual, scenic and historic significance.
